DIFICULTAD:

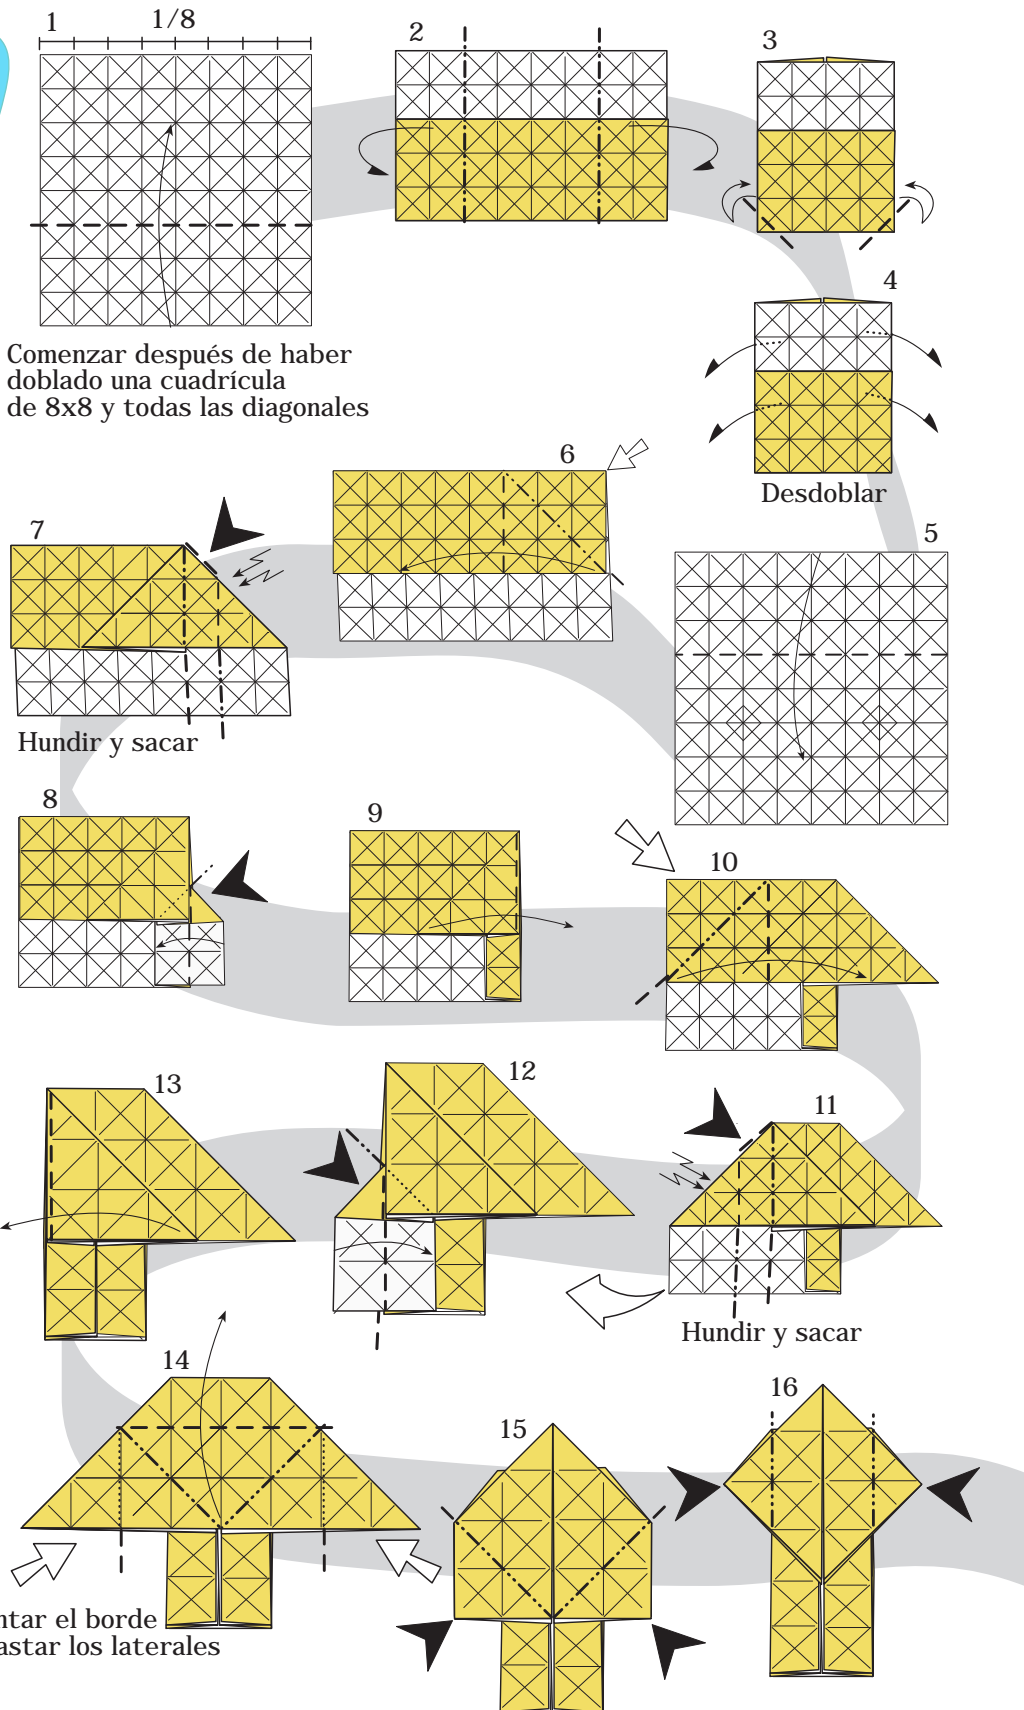

TAMAÑO:  50 cm = 19 cm

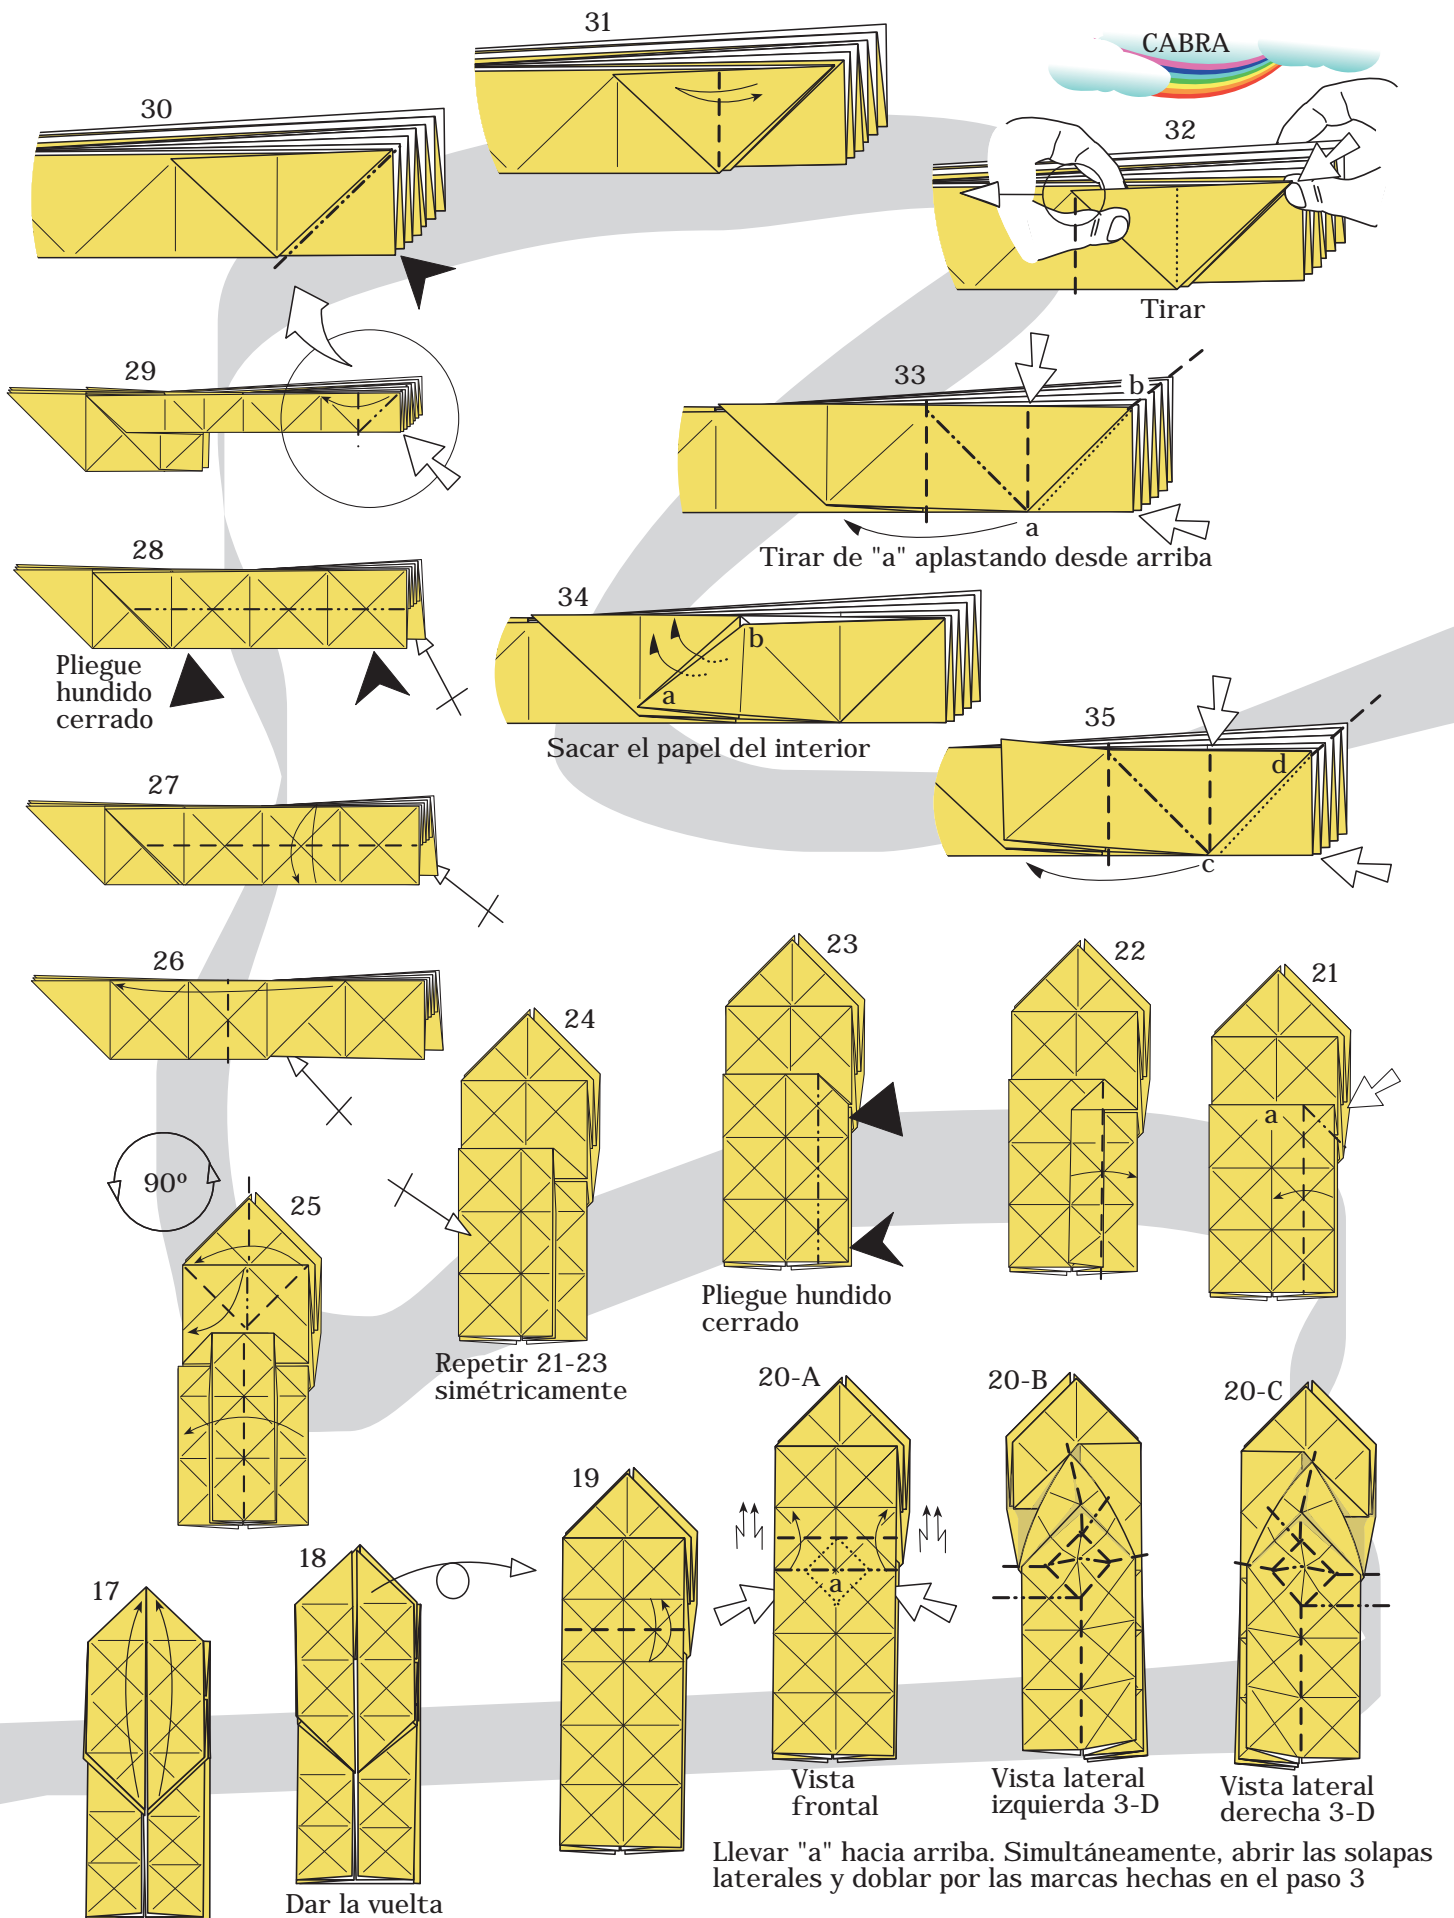

COMENTARIO:

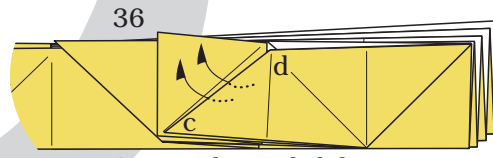

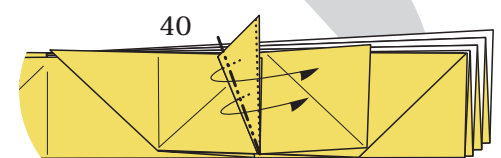

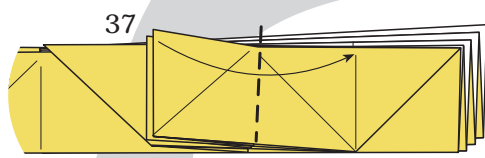

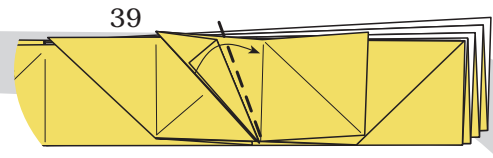

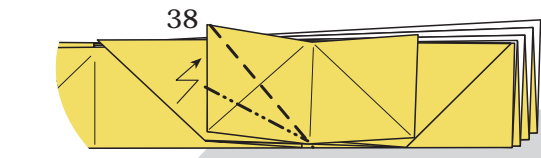

Hay que marcar bien el paso 3, porque es fundamental para plegar sin problemas el paso 20, el cual se representa con tres diagramas que muestran el paso desde tres ángulos simultáneamente.

Debido a la cantidad de capas necesarias para hacer la cabeza, hay que fijarse bien para no perderse con los pliegues estirados y hundidos.

Los paso 72 y 73 son interiores, por lo que hay que abrir el modelo ligeramente para poder plegar las ubres correctamente.
